Libin Guo
832-668-4022 | Austin, TX | libinguo89@gmail.com | LinkedIn | GitHub | Website

Software engineer with 9+ years building large-scale data pipelines and distributed compute systems (Spark, Ray, Iceberg, Kubernetes), most recently preparing training data for world model

EXPERIENCE

Reka AI | Member of Technical Staff, Data Platform | Austin, TX | May 2026 - Oct 2026

- Optimized Python/PySpark and Ray-on-Kubernetes pipelines that prepare video data for training world language action models, using Ray for extraction and batch inference jobs to improve CPU and GPU utilization.
- Added data-quality checks, QA reports, and Slack monitoring that catch bad data before training, and delivered Energon WebDatasets to the research team for pretraining, SFT and distillation.

Apple Inc. | Senior Software Engineer, Data Platform | Austin, TX | Dec 2021 - Jan 2026

- Scaled REST API platform orchestrating 2,000+ Spark jobs across a 20 PB Iceberg data lake.
- Saved $0.5M/year and cut micro-batch runtimes by 75% by tuning Spark configurations across 20+ Airflow/Spark/Kubernetes ETL pipelines on AWS.
- Built full stack application that enables data lake AI agent (MCP servers) that assesses Snowflake-to-lakehouse migratability of ingestion jobs, cutting assessment time from weeks to minutes, plus an LLM evaluation framework to validate reliability.
- Drove Snowflake and DBT adoption with Airflow integration, migrating legacy pipelines and growing internal lakehouse usage 20% YoY.

JPMorgan Chase |Data Engineer | Dallas, TX | Oct 2020 - Nov 2021

- Built ingestion pipelines to load real-time data into the data lake using Kafka/Kinesis, AWS Glue, Lambda, and Step Functions, with infrastructure managed in Terraform.

Healthmine | Data Engineer | Dallas, TX | Sep 2018 - Oct 2020

- Built Python/SQL/AWS ETL pipelines for multi-tenant claims data, stood up a Postgres warehouse (Airflow, Spark on EMR), and migrated dozens of Talend jobs to Airflow with Superset SLA dashboards.

Qlarant Integrity Solutions | Senior Data Analyst | Dallas, TX | Mar 2016 - Aug 2018

- Conducted dozens of data and statistical analysis to detect Medicare fraud using SQL, SAS, and Tableau.

SKILLS

- **Languages:** Python, SQL, Bash, JAVA
- **Data Engineering:** Spark (PySpark), Ray, Iceberg, Airflow, dbt, Snowflake, AWS Glue, Parquet, Postgres, DynamoDB
- **AI / LLM:** LangChain, LangGraph, DSPy, RAG, MCP, Claude API, LLM Evaluation, PyTorch, WebDataset/Energon, AI-assisted development (Claude Code, Codex)
- **Cloud & DevOps:** AWS (S3, Lambda, EMR), Kubernetes, Docker, Slurm, Terraform, CICD, FastAPI, Grafana

EDUCATION
M.S. Information Technology and Management, University of Texas at Dallas (2015) | M.A. English Language and Literature, Shanghai Normal University (2014) | B.S. Computer Science, Shandong Agricultural University (2011)

CERTIFICATIONS & PROJECTS
Certificates: LLMOps (DeepLearning.AI), AWS Certified Solutions Architect – Associate, SAS Predictive Modeler
Projects: Dinner Match Lab, Moriarty (Beta)
